A

Abbamonte, A., Cylinder cock designed to operate automatically 313*

Accident prevention, The fatigue element in, by Wm. Baum 181*

Accounting, Report of Committee on General (Div. VI—Purchases and Stores)

A'Hearn, F. M., A discussion of loose crown brasses 202‡

A'Hearn, F. M., An epidemic of locomotive troubles 354*

Air brake (see also Brake).
Air Brake Assn. convention proceedings 349*, 424*

Air brake investigation by I. C. C. 521

Air brake room, Convenient facilities for the, by F. G. Bonzheim 241*

Air brake valve and lubricator holder 242*

Air brakes, Defective, on freight cars, by Bryan Barton 266‡

Air brakes, Interesting employees in the study of, by J. P. Stewart (Air Brake Assn.) 428

Air compressor, Belt driven, Sullivan Machinery Co. 127*

Air compressor, Small portable, Ingersoll-Rand Co. 566*

Air Reduction Sales Co., Oxygraph adapted to railroad practice 1588*

Aishton, R. H., Address by (C. I. & C. F. convention) 609

Aishton, R. H., Address by (Div. V—Mech.) 1457§, 1461

Aishton, R. H., Address of (Div. VI—Pur. and Stores) 1647, 1669§

Aishton, R. H., The conventions an institute of economy 1583

Ajax Mfg. Co., A rocker type drop lock for forging machine 253*

Alarm, Improved low water, Talmage Mfg. Co. 1615*

Alarm, Low water, of the float type, United States Metallic Packing Co. 252*

Albanese, G. S., A. L. M. slack adjuster 51*

American Bolt Corp., Two lock nut developments 1415*

American Crusher & Machinery Corporation, Crusher for chips and turnings 1417*

American Locomotive Co., Tests of three-cylinder Mikado for South Manchurian. American Metal Hose Co., Flexible metal hose adapted to railway use 658*

American Pulley Co., A pressed steel shaft hanger 248*

395*

AMERICAN RAILWAY ASSOCIATION

Arbitration Committee, Report of 1672

Committees, Backing up the 1429§

Committee work, Importance of 513§

Convention, Is the, worth while? 1716§

Exhibits: First impressions 1398§

Mechanical and stores department cooperation 1397§

Meetings: A wonderful opportunity 1429§

DIV. V—MECHANICAL

Brakes and brake equipment, Report on 1729*

Car construction, Report on 1634*

Committee work, Planning 1591§

Committees, Checking up 1619§

Convention: An outstanding success 1543§

Convention Program 1667§

Conventions an institute of economy 1399

Election of officers 1633,

Electrical day 1430§

Exhibits 1418*

General committee, Report of 1439

Guests of the Mechanical Division 1435†

Lighting, Report on locomotive and car 1544§, 1558*

Loading rules, Report on 1684*

Locomotive design and construction, Report on 1443

Locomotive utilization, committee 1430§

Members, The departed 1431§

Members, The new life 1432§

DIV. V—MECHANICAL—Continued

Nominations, Report of committee on 1441

Prices for labor and materials, Report on 1671

Resolutions committee, Report of 1728

Rolling stock, Report on electric 1560*

Safety appliances, Report on 1686

Shops and engine terminals, Report on design of 1464*

Specifications and tests for materials, Report on 1638

Standards for painting cars and locomotives, Report on 272

Tank cars, Report on 1675*

Welding, Report on autogenous and electric 1716§, 1718*

Wheels, Report on 1730*

_EQUITMENT PAINTING SECTION

Paint and varnish at terminals, Report on care of 628

Paint, varnish and corrosion, Report on removing 626

Shop construction and equipment, Report on 626

Standards—cars and locomotives, Report on 627

Tests, Report on 627

DIV. VI—PURCHASES AND STORES

Accounting, Report on general 1653

Buildings and facilities, Report on department 1656*

Classification of material, Report on 1747

Election of officers 1749

Forest products, Report on 1689*

Fuel conservation, Report on 1748

General committee, Report of 1648

Material accounting and office appliances, Report on 1652

Meeting of 1592§, 1595§

Purchasing agents' records and organization 1743

Reclamation of discarded material, Report on 1745*

Stores delivery of material, Report on 1698*

Stores department book of rules, Report on 1649

Supply train operation, Report on 1693

Unit piling of material, Report on 1739*

A. R. A. car repair billing, by B. F. Jamison (C. I. & C. F. convention) 610,

American Railway Tool Foremen's Assn (see Tool Foremen's Assn.)

American Saw Mill Machinery Co., A power feed rip saw requiring small floor space 390*

American Welding Society meeting 1706

American Wood Impregnation Corp., A preservative for treating car timbers 1714

Anderson, A. H., Reclaiming coupler yokes 328*

Anderson, H. A., The correct and incorrect use of fuel oil 169*

Anderson, J. A., Address by (Tool Foremen's Assn.) 621*

Angle cock, Hanford, Car Devices Co. 507*

Angle cocks, Reclamation of, on a turret lathe, by A. Skinner 436*

Apprentice competition, Regular 71§

Apprentice, Regular, competition article by Earl D. Austin 138

Apprentice, Regular, competition article by F. O. Robinson 213*

Apprentice competition, Regular, article by John M. Wylie 577§

Apprentice competition, Regular, article by W. L. McGowan 598*

Apprentice, Regular, competition article by H. L. Price 11*

Apprentice competition, Special article by Roy Eckart 86*

Apprentice training: Is it really worth while? 15*

Apprentice training: Building for the future 4§

Apprentice system, Kansas City Southern. Apprentices, Rating personal characteristics of 654‡

Apprentices, Train (Boiler Makers' convention) 498

Apprenticeship, Boy's eye-view of 1431§

Apprenticeship methods on the Santa Fe, 321§, 355*, 415, 455§, 467*, 513§, 527*, 654‡, 1716§

ARBITRATION COMMITTEE DECISIONS

Case No. 1272—Wrong repairs should be corrected within nine months 219

Case No. 1274—Responsibility for car damaged in switching 95

Case No. 1275—Defect cars repudiated 26

Case No. 1276—Damaged car moved from owner to handling line and back 26

Case No. 1277—Safety appliances damaged in derailment 26

Case No. 1278—Duplicate charge for repacking journal boxes 95

Case No. 1279—Air brakes cleaned more than once within sixty days 95

Case No. 1280—Case under Rule 32 168

Case No. 1281—Car of light construction damaged in switching 168

Case No. 1282—Superstructure of car telescoped 219

Case No. 1283—Failure to furnish sufficiently specific information 291

Case No. 1284—Making wrong repairs to damaged cars 291

Case No. 1285—Joint evidence of wrong repairs filed too late 291

Case No. 1286—Rule 32—Car damaged in switching 291

Case No. 1287—Loss of lading due to leaky safety valves 292

Case No. 1288—Owner is made responsible for car damaged by rough handling 292

Case No. 1289—Journal boxes not properly repacked 292

Case No. 1290—Furnishing of repair material by the car owners 359

Case No. 1291—Acceptance of defective cars on record 359

Case No. 1292—Facts for handling of exceptions on bills for repairs 359

Case No. 1293—Overlapping labor charges 421

Case No. 1294—Rules governing prices changed before repairs are completed 421

Case No. 1295—Bill for repairs should agree with the defect card 485

Case No. 1296—Car burned while in interchange 485

Case No. 1297—Incomplete evidence furnished to support claim for wrong repairs 421

Case No. 1298—Responsibility for repairs to safety appliances 547

Case No. 1299—Rule 120—A change of prices before repairs are completed 547

Case No. 1300—Acceptance of bad order cars by the owner 547

Case No. 1301—Responsibility for damaged car 548

Case No. 1302—Responsibility for damaged car 548

Case No. 1303—Car damaged by a sudden train stop 614

Case No. 1304—Failure to stencil air brakes properly 614

Case No. 1305—Damaged car is received in interchange 684

Case No. 1306—Responsibility for damaged car 684

Case No. 1307—Car damaged in hump switching 614

Case No. 1308—Car repairs claimed and not made 747

Case No. 1309—Specific joint evidence not conclusive as to general conditions 684

Case No. 1310—Responsibility for car destroyed by fire 747

Case No. 1311—Responsibility for pulling out draft gear 684

Case No. 1312—Responsibility for car damaged in switching 748

Case No. 1313—Responsibility for wrong repairs 747

Arbitration Committee report (Div. V—Mech.) 1672

MACHINE TOOLS

Borer, A car wheel, with automatic chuck and power traverse, Betts Machine Co. 183*
 Boring and facing machine for locomotive driving boxes, William Sellers & Co. 379*
 Boring equipment, Portable small cylinder, H. B. Underwood Corp. 387*
 Boring machine, Duplex locomotive rod, Newton Machine Tool Works. 643*
 Boring machine equipped with a double hoist, A car wheel, Betts Machine Works 385*
 Boring machine, Locomotive rod, Baker Bros. 48*
 Boring machine, Tri-way horizontal, Universal Boring Machine Co. 565*
 Boring mill, A 100-in. Double driven vertical, Consolidated Machine Tool Corp. 251*
 Boring mill, 8-ft. massive Cincinnati Planer Co. 50*
 Chuck, Tooth key and sleeve type, Jacobs Mfg. Co. 397*
 Drill, A light-weight pneumatic Ingersoll-Rand Co. 1417*
 Drill and taping machine, A sliding head, self-oiled, Barnes Drill Co. 446*
 Drill, Telltale, Ingersoll-Rand Co. 1712*
 Drill for reaming service, A special air, Chicago Pneumatic Tool Co. 314*
 Drill, Portable electric, Black & Decker Co. 185*
 Drill press, Two-spindle, Colburn Machine Tool Works. 315*
 Drill, Side handle portable, Hisey-Wolf Machine Co. 190*
 Drilling and Boring machine, Cam feed, Baker Bros. 640*
 Drilling machine, A 6-ft. ball-bearing radial, Dreses Machine Tool Co. 374*
 Drilling machine, Heavy duty, Foote-Burt Co. 639*
 Drilling machine, Portable, Wm. Asquith Grinder, A combined cutter and radius, Keller Mechanical Engineering Corp. 122*
 Grinder, A pneumatic motor and portable, Cleveland Pneumatic Tool Co. 1454*
 Grinder, Bench type twist drill, Gallmeyer & Livingston Co. 386*
 Grinder equipped with universal table, Internal, Hi-Way Service Co. 59*
 Grinder, Flexible shaft, Keller Mechanical Engineering Corp. 189*
 Grinder for locomotive cylinders, Internal, Churchill Machine Tool Co. 1411*
 Grinder for small tools, Bench, Hisey-Wolf Machine Co. 569*
 Grinder, Heavy duty face, Bridgeport Safety Emery Wheel Co. 59*
 Grinder, Heavy duty floor, Cincinnati Electrical Tool Co. 638*
 Grinder, Universal tool room, Gallmeyer & Livingston Co. 570*
 Grinding and quartering machine, Crank pin, Churchill Machine Tool Co. 1588*
 Grinding machine designed for the unskilled workman, Luther Grinder Mfg. Co. 312*
 Grinding machine, Internal and link, Gisholt Machine Co. 763*
 Grinding machine, Piston rod, Norton Co. 765*
 Grinding machine, Single stroke surface, O. S. Walker Co. 120*
 Grinding machine, Surface, Production Machine Co. 1454*
 Grinding machine, Universal, with constant speed drive, Brown & Sharpe Mfg. Co. 310*
 Lathe, An automatic, with two carriages, Lodge & Shipley Machine Tool Co. 704*
 Lathe, A 13-in. Model B, Pratt & Whitney Co. 394*
 Lathe, Combination journal truing and axle, Betts Machine Works 122*

MACHINE TOOLS—Continued

Lathe, Four speed production, Reed Prentice Co. 701*
 Lathe of high capacity, A hollow hexagon, Warner & Swasey Co. 706*
 Lathe, Geared head, with helical gears, Monarch Machine Tool Co. 764*
 Lathe, 22-in. geared head, Morris Machine Tool Co. 370*
 Lathe, Hartness flat turret, for chucking work, Jones & Lamson Machine Co. 388*
 Lathe, Heavy duty, provided with rapid power traverse screw, Niles-Bement-Pond Co. 503*
 Lathe, Powerful turret, and tooling arrangement, Gisholt Machine Co. 128*
 Milling machine, A 58-in. heavy duty locomotive rod, Niles-Bement-Pond Co. 245*
 Milling machine, A portable key seat, by E. A. Murray 342*
 Planer equipped with a self-lubricating system, G. A. Gray Co. 381*
 Planing machine, A 40-in. stroke crank, Newton Machine Tool Works. 392*
 Saws (see Saws)
 Shaper, A heavy duty 32-in. crank, Stockbridge Machine Co. 371*
 Shaper, Conveniently operated heavy duty, Gould & Eberhardt. 1414*

SHOP KINKS

Bolts, Foot-operated machine for cutting clamp 110*

Bracket for holding scaffolding on side of a car 168*

Caliper and gage for laying out the shoulder fit on driving box brasses (C. & N. W.) 685*

Calipers, Offset, made to clear bolt and nuts of chuck (C. & N. W.) 686*

Chart, A useful horizontal tank, by W. F. Schaphorst 759*

Chuck for clamping brass on slotter (C. & N. W.) 686*

Chuck for clamping crown brasses on boring mill (C. & N. W.) 685*

Chuck for holding driving boxes, Boring mill (C. & N. W.) 687*

Chuck for holding main rods on slab milling machine (General Foremen's Assn.) 636*

Chuck for holding Markle removable crown brasses when cutting the taper for the retaining key (C. & N. W.) 687*

Chuck for guides, shoes and wedges, and crosshead gibs 304*

Chuck for holding shoes or wedges while planing to line 105*

Chuck for rod brasses, Swivel 299*

Clamp, A portable air, for holding work on drill press table 243*

Clamping device for attaching blue flag to rail, by Charles Nugent 537*

Clamp, Crane lifting 500*

Crane for removing cylinder heads in the enginehouse, by George W. Lucas 750*

Crane shock absorber (Lehigh Valley) 497*

Crank pins, Saving operations in finishing (N. & W.) 303*

Crosshead mandrel, An adjustable, by H. H. Henson 490*

Crosshead puller, Locomotive, by E. A. Miller 697*

Device for inserting long bolts, by J. J. Sheehan 762*

Device for lapping in triple valve piston rings (General Foremen's Assn.) 635*

Device for removing or applying heavy locomotive springs, B. & O. (Tool Foremen's Assn.) 691*

Device for reseating Cole pop valves. Dowel, Rod bushing, by H. L. Loucks (Erie) 365*

Drawing table for the machine shop, by H. H. Henson 175*

Drill press, for use in wheeling locomotives (Oregon-Washington R. R.) 365*

Drilling telltale holes, Machine for (N. Y. N. H. & H.) 38*

Driving box shoe planing device, by J. D. Snyder 109*

Driving box wedge jig, by H. H. Henson 488*

Eccentrics on axles, Machine for locating, by L. V. Mallory (Missouri Pacific) 101*

Flanging collars on copper pipe, Tool for, by E. A. Miller 696*

Grinding cylinder head joints, Machine for (General Foremen's Assn.) 47*

Holder-on for bullring rivets, by F. W. Lampton 635*

Injector test rack 242*

Jack, Drop pit, operated by hydraulic pump (General Foremen's Assn.) 294*

Jack, Shoe and wedge pit 634*

Jig for boring low pressure cylinder heads, by T. H. Hahn 496*

Jig for drilling cylinder saddle bolt holes, by E. A. Murray 688*

Jig for grinding air pump valve bushings on a Heald machine 244*

Jig for reborning 8½-in. air pump cylinders, by E. A. Miller 182*

Jigs for turning and boring eccentric strap bushings, B. & O. (Tool Foremen's Assn.) 244*

Lathe attachment for turning lift shaft ends 691*

Lathe work, Holding, without injury, Lloyd R. Carson 332*

Lever, Hoisting, for applying couplers 497*

Links for coupling wreck crane cables 743*

Machine for clamping elliptic car springs 748*

Machining driving boxes (B. & M.) 748*

Milling attachment, Piston valve bushing port, by H. H. Henson 102*

Milling machine, A portable key seat, by E. A. Murray 342*

Multile extension outlet (Union Pacific) 234*

Parallels for planing driving boxes (C. & N. W.) 687*

Piston rods, Device for removing, by Sidney H. Pratt (B. & O.) 759*

Press, Truck wheel, converted into a driving box press, by V. T. Kropidowski 490*

Pumps, Cleaning out air (A. T. & S. F.) 558*

Radius attachment for shapers, Link, by H. H. Henson 102*

Reservoir, Portable oil, by E. A. Miller 240*

Roller support for heavy work, Universal (General Foremen's Assn.) 635*

Shoes and wedges, Preventing, from breaking in service 761*

Spreader for locomotive welding, by L. M. O'Kelley (Seaboard Air Line) 37*

Spring puller, A convenient, by E. A. Miller 366*

Stand for use in repairing distributing valves, An adjustable, by F. G. Bonzheim 241*
